

INSTALLATION

Close all applications, including Interface.

Even if your data was automatically saved before the installation, we recommend that you make a backup copy on a diskette.

Insert the Interface Suite CD-ROM in your drive and the installation will begin automatically.

If this doesn't happen, double-click on the My Computer icon and then double-click again on the corresponding CD drive.

For those who receive the weekly clientele update over the Internet

Once installation is complete, connect to the Head Office to receive a complete client file update.

To be installed before: June 18, 2004

After this date, no applications can be submitted electronically with previous versions of Interface Suite as they will no longer be accepted by the system.
